a Folds track their prior
held-out gene all B/LB
held-out gene all P/LP
both classes
HMGCS2
r = 0.74
mean prediction for the held-out gene
pathogenic fraction of the training genes
b Cross-fold comparison removed
pooled LOGO
prior shift
leave-two-genes-out
Position-level scores
Full 19-feature model
AlphaMissense only
between-gene component, AUC$_B$
c Detectable effects
conservation
DCS
AlphaMissense
80% power at AUC$_W$ = 0.76
power of the stratified permutation test
true within-gene AUC
